Content Audit Report
March 29, 2026

60/100

Content Health Score
(needs attention)

Based on content analysis — connect Google Analytics for a complete score

100% of your posts have zero structured data — AI systems can't cite what they can't read.

[tended.app](#)

Executive Summary

Your site **zapier.com** scored **60/100** on content health, meaning your content ecosystem is showing moderate issues that need attention. We generated **85 specific recommendations** across your content.

We found **268 content issues** and **25 cannibalization pairs** where 35 of your 148 posts have significant content overlap.

148 Posts Analyzed	9 Topic Clusters	268 Issues Found
------------------------------	----------------------------	----------------------------

Actions across 4 categories: schema markup, readability improvement, content freshness, AI optimization.

AI Readiness: Your content scores **58/100** on AI citability but **0/100** on structured data — the single biggest barrier to AI citation. See page 4 for the full breakdown.

Key Findings

- 148 of 148 posts have no structured data
- 25 pairs compete, 5 high-severity
- 82% below readable threshold
- **28 posts stale 18+ months**

Content Profile

- Average post length: **2,470 words** (long-form content)
- Average readability: Flesch **49** (difficult)
- **Your content structure scores 58/100 on AI citability**

Your average post length (2,470 words) is above the B2B SaaS median (1,800 words). Your readability (Flesch 49) is below the recommended threshold of 60. Your E-E-A-T score of 84/100 is strong, but the 0/100 schema score means AI systems can see your expertise signals but can't machine-read your content.

AI Readiness

Your content scores **58/100** on AI citability — but **0/100** on structured data.

58 /100 Citability	84 /100 E-E-A-T	0 /100 Schema	80 /100 Extraction
------------------------------	---------------------------	-------------------------	------------------------------

Why AI systems skip your content

- 100% of your posts have no structured data — invisible to Google rich results (enhanced search listings)
- Only 16% of posts have FAQ sections — posts with FAQ structured data get significantly higher AI visibility

What this means: Without structured data, your posts are invisible to Google's rich results and less likely to be cited in AI Overviews. Adding Article structured data is the single highest-impact change you can make. Google AI Overviews now appear on ~50% of searches.

Issue Breakdown

- 156** AI readiness issues (missing structured data, low citability) — reducing AI citation eligibility
- 80** Content quality issues (readability, thin content) — making content harder to scan
- 28** Freshness issues (content not updated in 18+ months) — losing relevance
- 4** SEO issues (title length, missing meta, no headings) — reducing search visibility

Individual posts may appear in multiple categories. Total reflects deduplicated issue count.

Topic Clusters

Your content organizes into 9 topic clusters. Top 5 shown.

Cluster	Posts	Health	Status
Business Analytics Integration	32	60	Moderate
AI Agents	22	62	Strong
Business Software Tools	20	63	Strong
AI Orchestration	20	59	Moderate
AI Workflow Automation	13	56	Needs Attention

Status based on content freshness trends and structural health, not score alone

Top 3 Quick Wins

1. Add structured data to your top posts

None of your 148 posts have structured data. Adding it enables rich results and AI citations.

→ Enables rich results for 100% of your 148 posts

2. Consolidate or differentiate: "4 ways to automate ChatGPT" vs "5 ways to automate Claude"

These posts are 56% similar and may dilute each other's search visibility.

→ Eliminate ranking competition between these 2 pages

3. Refresh: The 8 best AI automation tools

20 months stale.

→ Restores freshness signals for The 8 best AI automation tools

Top 5 Posts Needing Attention

#	Post	Score	Issues
1	AI in the workplace: 5 ways to adapt	34	Low AI citability, No structured data (+1 more)
2	Sales metrics: 10 metrics	36	Low AI citability, No structured data
3	How to choose automation	37	No structured data, Moderate traffic decline
4	AARRR pirate metrics	37	No structured data, Mild traffic decline
5	4 ways to make AI less scary	41	Low AI citability, No structured data

Example Fix — Your lowest-scoring post

AI in the workplace: 5 ways to adapt (score: **34**)

Current AI citability: *10/100*

Add Article JSON-LD schema with headline, datePublished, author, and image. Add 2-3 data tables or original statistics. Start key H2 sections with direct answers.

Top Cannibalization Pairs

Post A	Post B	Similarity
4 ways to automate ChatGPT	5 ways to automate Claude	56%
5 ways to automate Mistral	5 ways to automate Claude	55%
Zapier vs. Make	n8n vs. Make	51%

Your 30-Day Action Plan

- **Week 1:** Add structured data to your top posts
- **Week 2:** Improve readability on 78 complex posts, starting with the lowest-scoring
- **Week 3:** Consolidate your 3 highest-overlap content pairs, starting with '4 ways to automate...' vs '5 ways to automate Claude'
- **Week 4:** Improve AI citability on 8 low-scoring posts with data tables and statistics
